King Bio's Appetite & Weight Control Breakthrough

Most everyone during the course of their lives has experienced the frustration and disappointments in dealing with weight management. Commonly within a few weeks of the New Year's resolution most people have fallen victim to their appetite and given up on the good cause. None of us are immune to the battle of the bulge.

The enormity of this problem has manifested a potpourri of products in the market place. These products, whether drug or natural, can either carry serious side effects or they just don't work well. The products presently in the market place rarely address the underlining causes to the problem.

After 25 years of practice, seeing over a quarter of a million patients with weight gain, I have discovered some key core answers to this perplexing problem.

Correcting the Cause

There are many underlining causes to excess weight residing in both body and soul. Homeopathic medicines have proven most effective in addressing the diversity of underlining issues. Throughout homeopathy's 200 years of clinical use, numerous controlled studies called "provings" were performed on each of its over 1300 ingredients. These studies were performed on healthy groups of humans by giving them a substance and observing whether or not it created any symptomatic patterns. Any symptomatic patterns, whether in the body, mind, will or emotions, were then accurately recorded. Then these substances were given in homeopathic potentization to sick people who had similar symptomatic patterns. Observing a cure would clinically confirm the efficacy of the homeopathic remedy. This information was then recorded in detailed reference books called *Materia Medicas* and *Repertories*.

At first glance homeopathy may seem to treat symptomatically. However quite the opposite is true. The human body is intimately connected with its environment. Substances that can cause a pattern of symptoms in a healthy person can activate a cure of that pattern of symptoms in a sick person when those substances are homeopathically potentized. This is done not by suppressing symptoms like an allopathic drug, but by expressing the healing powers resident within us to heal.

Symptoms are simply the body's innate ability to communicate to us in a detailed and specific language. Homeopathy has unlocked the code to the body's innate language of symptoms so that we can better help enhance health rather than just suppress the symptoms. Symptoms are simply the messenger, not the disease. Suppressing the

symptom is like shooting the messenger because we didn't like the message. Homeopathy works to express health rather than just suppress disease.

Now with this basic understanding of homeopathy we can better understand how homeopathy can work deeper within us to correct the inner issues behind weight gain. The following information will empower you to better address the many underlining causes behind excessive appetite and weight gain through treating the whole person including body, mind, will and emotions.
