## **The Advantages of the Easy One-Handed Pump Spray Delivery**

Convenience creates compliance. Compliance is a common challenge whenever it comes to doing something good for our lives. Homes are cluttered with unused exercise equipment and have cupboards full of partially consumed health products. The least little inconveniences can easily deter us from taking a health product that can help us. The most common reason patients don't receive results is lack of compliance.

We have developed an easy one-handed pump spray that makes taking remedies easy for everybody. Our medically metered pump spray offers many advantages to both doctor and patient.

- Easy one-handed pump spray delivery allows you to take a dose any time anywhere without embarrassment. With the contoured top on the pump spray you can simply take King Bio remedies in the dark or while driving in rush hour traffic.
- Assures accurate dosage every time. One pump spray for newborns to two years of age. Two pump sprays for two years to twelve years. Three pump sprays for adults.
- No opening, no closing, no measuring, no spillage, no touching product, no contamination, no anti-doting and no more fumbling with the inconveniences of blister packs or eyedroppers which means no problems taking our products. Contamination is very easy with homeopathy. Aromas in the air or oils in the hand can antidote its effectiveness. The closed delivery system of the medically metered pump spray assures no anti-doting from perfumes, incense or cosmetics.
- No swallowing necessary. This is great for children, the elderly or anyone who has difficulty swallowing. Most people on nutritional programs don't want more pills to swallow.
- Fun to take. The spritzer sensation creates a positive reinforcement for both children and adults. This makes taking remedies easy for the whole family.

Once you have used our easy one hand pump spray, you will never want to go back to the old cumbersome ways of taking a remedy. Taking remedies that are both easy and fun is essential towards helping us stay diligent with what will help us.

## How To Use The Pump Spray

Before the initial dose, depress the pump spray 4-5 times or until primed. Now the pump spray is primed for all continued usage.

**FOR INTERNAL USE:** Hold close to the mouth and spray one dose directly in the mouth 4 to 6 times daily. You can increase or decrease the frequency of the dose according to symptomatic demands and retesting results. Increased frequencies to begin treatment will bring faster results. The more acute the symptoms the more frequent the dose. For example at the onset of a migraine, I recommend taking it every 10 minutes for an hour. Then you can decrease the dosage.

Adult Dose	3 complete pump sprays
Child's Dose (2-12 yrs)	2 complete pump sprays
Newborn-2 yrs	1 complete pump spray

\*Be sure to completely depress the pump spray for maximum dosage.

**FOR EXTERNAL USE WHEN APPROPRIATE:** Simply spray the affected areas and gently rub into skin 4 to 6 times daily. Because of our pure water base there are no embarrassing odors, no staining, no drying of the skin, and no problems with topical application.

Do not spray in the eyes or ears. When applying to the eyes, close the eyes and mist over the closed eyes. When applying to the ears, mist behind or around the ears.

You can apply King Bio remedies topically for any localized conditions. You can apply topically as often as necessary. Topical or external application adds additional therapeutic value to your treatment program. However it is not a replacement for oral or internal use. Always use internally.

### **A few examples:**

For back, neck or joint injuries, simply spray the affected area.

For sinus, simply spray over the affected area.

For weight loss, simply spray over the areas where weight gain is accruing. If you gain weight under your chin, around your waist or in your hips, simply spray those areas.

The King Bio pump spray delivery system offers all the best advances to maximize your success. Enjoy the journey!
